

CITY OF LODI COUNCIL COMMUNICATION

AGENDA TITLE: Approve Plans and Specifications and Authorize Advertisement for Bids for Lodi Multi-Modal Station Driveway Replacement Project

MEETING DATE: July 16, 2008

PREPARED BY: Public Works Director

RECOMMENDED ACTION: Approve plans and specifications and authorize advertisement for bid for the Lodi Multi-Modal Station Driveway Replacement Project.

BACKGROUND INFORMATION: The Lodi Multi-Modal Station was completed in 1999. The project included the relocation of the transit depot, construction of the north annex and clock tower, as well as the transfer island, parking lots and driveways. The driveway at the multi-modal station connects passengers at the transfer island with the passenger lobby inside the renovated transit depot. The driveway is deteriorating and has been temporarily patched to prevent a tripping hazard.

The proposed project consists of removal of the existing driveway and re-pouring the concrete driveway. The current driveway utilized decorative, colored concrete. The replacement will be traditional concrete stained to match the remainder of the Lodi Station. Core samples of the existing driveway have been completed, and the new driveway has been designed to better accommodate the weight of transit vehicles.

FISCAL IMPACT: Without replacement, the driveway will continue to deteriorate requiring more maintenance and increasing the City's liability that someone could trip and/or fall.

FUNDING AVAILABLE: This project has been included as a Transit Capital Project in the 2008/09 Fiscal Year Budget.

F. Wally Sandelin
Public Works Director
